REPORT OF THE BOARD OF TRUSTEES.

CITY HOSPITAL, BOSTON, April 30, 1880.

TO THE HONORABLE CITY COUNCIL: —

The Board of Trustees of the City Hospital, in compliance with the Ordinances, respectfully present herewith their Sixteenth Annual Report.

Number of patients remaining in the Hospital, April 30, 1879		303
Admitted during the year —		
Medical	2,444	
Surgical	1,463	
Ophthalmic	88	
		3,995
Treated during the year		4,298
Discharged	3,608	
Died	401	
		4,009
Remaining in Hospital, April 30, 1880		289

Largest number in Hospital at any time	328
Smallest number in Hospital at any time	223
Daily average number of patients	$272\frac{2}{3}$
Average length of stay of each patient (days)	$23\frac{1}{5}$

Number of patients treated in the out-patient department, classified according to their diseases: —

Medical diseases	2,583
Surgical "	4,092
Diseases of the Eye	1,860
" " Ear	329
" " Skin	715
" of Women	274
" " Nervous System	145
" " the Throat	311
Total	10,309

Number of visits to the Hospital classified according to diseases: —

Medical diseases	4,722
Surgical "	11,308
Diseases of the Eye	10,864
" " Ear	2,089
" " Skin	1,447
" of Women	764
" " Nervous System	862
" " the Throat	1,008
Surgical out-patients treated at accident room, and not elsewhere included	946
	34,010

The report of the Superintendent and Resident Physician, presented herewith, contains, besides other information, a statement of the expenditures of the year, and is accompanied by the reports of the medical staff. These reports give in detail the number of patients treated in the Hospital, and the number treated in the out-patients department during the year, with classified statements of their diseases and the results of treatment.

The whole number of patients in the Hospital during the year was 4,298, and they were under treatment an average of 23.20 days each, making a total of 99,580 days, or 14,225.5 weeks. The entire cost of maintaining the Hospital during the year, including every expenditure, excepting the cost of additions and reconstruction of buildings, was at the rate of $8.26\frac{5}{10}$ per week $117,588 37

But of the patients enumerated above, 297 paid, for $1,053\frac{5}{7}$ weeks' board . . $8,366 11

Leaving, therefore, the sum of . . . $109,222 26

as the cost to the city of treating 4,001 non-paying patients, for a total of 13,072 weeks, which is at the rate of $8,43\frac{1}{10}$ per week. But after deducting money received from pay patients, stock on hand, etc., and averaging the *net cost* of maintaining the Hospital for the year among all the patients treated, we find the average cost to the city, of board for each patient, was $7.46\frac{3}{5}$ per week.

The report of the Superintendent explains in detail the expenditures made during the year in maintaining the Hospital.

By his statements, and the above figures, and by a comparison with previous reports, it will be seen that during

the past year the largest number of patients in the Hospital at any one time was 42 less than last year; the smallest number at any one time was 5 less; the daily average was $16\frac{5}{6}$ less, and the average length of stay of each patient was $1\frac{1}{5}$ days less.

The net cost of maintaining the Hospital has been $2,489.32 less than last year; but the decrease in the total weeks' board has been $1861\frac{1}{10}$ weeks; and while there has been a decrease of $10\frac{3}{10}$ per cent. in net cost, there has been $11\frac{2}{10}$ per cent. decrease in total weeks' board, which explains the slight increase in cost per week.

During the past year no very extensive work has been done in the way of reconstruction. The total expenditure for the year has been nearly $10,000 less than any year for the last five years, and the annual appropriation was barely enough to meet our immediate wants.

Much, however, has been done in carrying out the previously contemplated improvements.

The new Dispensary has been completed, giving improvements much needed, and facilitating the methods of work in that department. The old Dispensary has been entirely reconstructed, and is now admirably adapted to the requirments of a Steward's office.

The sanitary condition of the wards for infectious diseases in Pavilion 3 has long been defective, in the arrangement of bath-rooms, water-closets, kitchen, etc. Radical changes have been made in Ward L, by which at moderate expense there have been obtained a dining-room, clothes-room, linen-room, water-closets, and bath-room for patients, and also a separate bath-room and water-closet for nurses, all without taking away any room from patients. Similar improvements are to be hoped for during the coming year in Ward K.

We would respectfully renew the recommendation of last year's report in regard to the advisability of securing additional land adjoining the Hospital grounds, between East Springfield street and East Chester Park, for Hospital purposes. The land will, before many years, be required for the further extension of the Hospital, and our own grounds are now nearly all occupied. To secure the land now, at a moderate price, would in the end be an economical measure, and likewise ward off various encroachments which are fast growing up on the water side of the Hospital grounds.

Attention is called to the recommendation of the Superintendent in regard to a separate building, to be used as a home for nurses. Such a building is one of our pressing needs, and it would place the Hospital on a footing with other first-class Hospitals.

The report of the Superintendent will give further information in regard to the Training School for Nurses.

Early in the year the school lost the valuable services of Miss Linda Richards, its lady Superintendent, who was obliged to withdraw on account of overwork and loss of health. The excellent basis on which the school was inaugurated, the efficiency of its methods of work, and its present reputation, are largely due to her zeal and ability.

The school was fortunate in securing the services of Miss A. C. Davis, who had the technical knowledge and experience necessary for the work. It is believed by those most competent to judge, that the school has done much to improve the quality of the nursing, advance the moral atmosphere of the Hospital, and is in a position to send out to the public competent and trained nurses.

During the past year better methods have been adopted to make the ambulance system more available and efficient. Through the liberality of the City Government, the Superintendent's office at the Hospital has been connected by telephone with police head-quarters, so that now the ambulance can be readily summoned from any part of the city if needed.

It should be stated, however, that the Hospital ambulance is not a public carriage, subject to the call of any person, to serve as a convenience, or to save carriage-hire, but is for the conveyance, to and from the Hospital, of patients who, by reason of accident or serious sickness, cannot be properly carried by the usual methods. Such persons as are able are expected to pay a reasonable sum for the service rendered.

There has been no change during the last year in the Board of Consulting Physicians and Surgeons, or of the Hospital Staff.

By act of the present Legislature, the Trustees of the City Hospital were made a corporation, and on the first Monday of May will be reorganized under that act. It is hoped that the many advantages which were urged as a reason for this change will take place, and that the Hospital will be remembered by way of legacies or donations of money.

We would respectfully urge upon the City Government a continuation of its liberal policy towards the Hospital, in order that its present high reputation may be maintained, and that it may continue to be conspicuous amongst Boston's charities.

On the first day of June, last year, the resignation of Dr. Edward Cowles as Superintendent and Resident Physician took effect. Dr. Cowles' connection with the Hospital extended over a period of seven years, and during that time he labored most zealously and successfully for the advancement

of the institution. The Trustees regret that the city should lose his services. Dr. Cowles was succeeded by Dr. G. H. M. Rowe, who was formerly connected with the Lunatic Hospital at South Boston, as its First Assistant Superintendent. From the manner in which he has performed his duties during the past official year the Trustees have every confidence that the successor to the retiring Superintendent has been well chosen, and that the Hospital will continue to enjoy its present high reputation.

Mr. Samuel M. Nesmith continues a faithful and most satisfactory Steward, and has proved a valuable officer to the Hospital and the city.

The vacancy in the office of Apothecary was filled, in October last, by the election of Mr. G. R. Tucker, who has performed the duties of his office efficiently and with commendation.

The clergy, as heretofore, have given many hours of ministration to the sick and dying. The thanks of the Board are due the many friends of the Hospital who have aided the management by contributing flowers, pictures, and reading matter, and whose personal visitations have brought comfort and consolation to the weary hours of the sick. Such tokens are matters of annual recognition, but are always worthy of mention, not only on account of the generous impulses that prompt the acts, but also for the unspeakable good to the sick and the dying.

To the gentlemen of the Hospital staff the thanks of the city and the Board of Trustees are specially due for their constant and laborious attendance on the sick, and their interest in matters relating to the good of the Hospital.

Respectfully submitted,

T. J. DACEY,

President of the Trustees of the City Hospital.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

City Hospital, April 30, 1880.

To the Board of Trustees: —

Gentlemen, — I have the honor to present herewith my Annual Report of the Hospital for the past year.

The following table shows the number of patients who have, each year, applied for admission, and been treated at the Hospital: —

	Patients examined for admission.	Patients admitted.	Patients accidentally injured.	Number of out-patients treated.
From June 1, 1864, to December 31, 1864	703	475	129	371
From January 1, 1865, to December 31, 1865	1,451	1,066	242	1,143
From January 1, 1866, to December 31, 1866	1,749	1,432	345	3,324
From January 1, 1867, to December 31, 1867	1,913	1,534	328	7,015
From January 1, 1868, to December 31, 1868	2,729	2,078	417	8,794
From January 1, 1869, to April 30, 1870	4,632	3,054	482	11,791
From May 1, 1870, to April 30, 1871	3,977	2,396	525	8,899
From May 1, 1871, to April 30, 1872	4,387	2,873	565	8,947
From May 1, 1872, to April 30, 1873	4,326	3,304	660	7,526
From May 1, 1873, to April 30, 1874	4,250	3,201	804	9,272
From May 1, 1874, to April 30, 1875	4,652	3,424	756	8,732
From May 1, 1875, to April 30, 1876	4,434	3,180	689	9,413
From May 1, 1876, to April 30, 1877	4,713	3,580	663	8,526
From May 1, 1877, to April 30, 1878	5,068	4,034	604	9,658
From May 1, 1878, to April 30, 1879	5,285	4,323	734	10,419
From May 1, 1879, to April 30, 1880	5,444	3,995	505	10,309
Total	59,913	43,949	8,448	124,069

The number of patients classified according to their diseases, who visited the Hospital for advice and treatment in the out-patient department, was as follows: —

Medical diseases, under charge of Drs. Mason and Sumner 2,583

Surgical diseases, under charge of Drs. Dwight and Bolles	4,092
Diseases of the Eye, under charge of Drs. Williams and Wadsworth	1,860
Diseases of the Ear, under charge of Dr. Green	329
Diseases of the Skin, under charge of Dr. Wigglesworth	715
Diseases of Women, under charge of Drs. Boardman and Chadwick	274
Diseases of the Nervous System, under charge of Dr. Denny	145
Diseases of the Throat, under charge of Dr. Cushing	311
Total	10,309

NUMBER OF VISITS MADE BY OUT-PATIENTS TO THE HOSPITAL.

Year.	Month.	Medical.	Surgical.	Eye.	Ear.	Skin.	Women.	Nervous.	Throat.	Total.

Net cost of maintaining Hospital from May 1, 1879, to April 30, 1880		$106,209 15

In the estimate made at the beginning of the year the amount appropriated by the City Government was $118,000; this was a smaller sum than the Hospital had received any year since the new buildings were completed, in 1876, when the capacity for patients was nearly doubled.

This fact at the outset compelled the management to hope for little beyond the strictest routine of expenditure.

In addition to this, the greatly increased cost of subsistence and general supplies had to be met, based on an estimate of the lower rates of the previous year.

By judicious economy and favorable contracts in such supplies as coal, ice, and milk, the total expenditure has been kept at nearly the same sum as last year.

The amount paid for salaries and labor is in excess of the previous year. While there has been an increase of employés demanded by various unavoidable causes, the salaries remain nearly the same; but certain labor previously charged to care of buildings has this year been charged to salaries and labor.

The item of $705.82, paid to Thomas Goggin & Co., was not anticipated at the beginning of the year, but was taken from the regular appropriation. This amount was paid by the City Auditor, on execution of Court, the same being awarded for special claims in the construction of the new buildings in 1876. Various sanitary improvements have been made in Ward L, as also alterations and additions in the new Dispensary and Steward's office.

Therefore, if we deduct from the total expenditure ($120,185) the amount paid to T. Goggin & Co., the cost of the alterations and additions above mentioned, and the expense of maintaining the ambulance department, which is not chargeable to the cost of maintaining the Hospital, the sum total is reduced to $117,588.37. This amount includes every expenditure, and gives a cost of 8.26\frac{5}{10}$ per week for each patient. If, also, we allow for the difference between stock on hand at the beginning of the year, and deduct new furnishings and fixtures (which are a part of the equipment), the income from paying patients and sale of old material, we have as the net cost to the city of running the Hospital, $106,209.71, or a *per capita* for all the patients treated during the year of 7.46\frac{6}{10}$ per week. The income from paying patients has been larger than that of any previous year. The care of this class, of course, involves a larger expense; but without this income the cost per patient would have been 8.26\frac{5}{10}$. Deducting the income of paying patients, and averaging the remainder, the cost is only 7.46\frac{6}{10}$. In other words, availing ourselves of the rules of

admission, that "where, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or part of the board shall be paid," we are able to reduce the price of each patient's board .80$\frac{5}{10}$ cents per week.

The annual appropriation was only $118,000, while the total expenditure was $120,185. Fortunately the Trustees could avail themselves of the income from Trust Funds in the hands of the City Auditor to the amount of $2,185, thereby preventing a deficit, which would have otherwise occurred.

By the foregoing statistics it will be seen that the total number of patients treated in the Hospital has been 333 less than last year. The wards have seldom been crowded, and no free patient has been rejected for want of room. The unusually mild winter, a decrease of acute diseases, and the return of business prosperity, have all combined to make the aggregate less than the last two years.

The various departments for out-patients have been more freely sought, the total visits made being 2,198 in excess of last year.

The largest number of patients in the Hospital at any one time was 328, which is 42 less than the corresponding number of last year. The smallest number at any one time was 223, which is 5 less than last year. The daily average was 272$\frac{2}{3}$, this number being 16$\frac{5}{6}$ less. The average length of stay was 1$\frac{1}{5}$ day less than last year, and the total weeks' board of patients was 1,861$\frac{1}{10}$ weeks less. While the total net cost of maintaining the Hospital has been $2,489.32 less than last year, the decrease in total weeks' board has been still greater, *pro rata* (11$\frac{1}{5}$ per cent.), which explains an apparent increase of 20$\frac{1}{10}$ cents per week. The number of patients admitted with accidental injuries was 505, which is less than last year.

Of all patients admitted 128 died within forty-eight hours after admission, this being .61 per cent. in excess of last year. This, as well as the increased death-rate, is explained largely by the fact that the wards were not crowded as usual in the winter months, and many cases were admitted during the last stages of chronic and incurable disease, in order to give them greater comforts than they could find in their own homes.

During the past year no extensive alterations or additions have been made, as there was no appropriation for this purpose. The Trustees have been able to do considerable from the current appropriation in finishing, as far as possible, the work necessary to complete and make uniform previous alterations. The old Hospital kitchen in the centre building

has been entirely altered and refitted as a Dispensary, which, with laboratory, store-rooms, and outfit, supplies a want long felt,and greatly facilitates the work in this department.

The old Dispensary has been remodelled as a Steward's office, and is admirably adapted for this purpose.

The old elevator in the centre building, which formerly went to the old operating-room in the dome, has been successfully utilized as a ventilating-shaft for the centre building. This has obviated the unpleasant odors that formerly pervaded the centre building, — an evil so common in administrative buildings where the Dispensary, kitchen, dining-rooms, etc., are in the basement, or in close proximity to it.

The sanitary condition of Ward L had been for a long time unwholesome and very objectionable. Changes have been made so as give the ward a commodious and well-arranged dining-room, bath-room, water-closets, linen-room, and clothes-room, all for patients' use; and also a separate bath-room and water-closet for nurses. Many other less extensive improvements have been effected in various parts of the Hospital, which add much to the facilities for daily work.

The Training School for Nurses, now at the end of its second year, has successfully continued its progress, and vindicates the judgment that led to its organization.

In July Miss Linda Richards, the Superintendent of the school, was compelled by ill-health, induced by long-continued overwork, to withdraw for a protracted rest. The school had been so thoroughly identified with her labors that this event was a serious loss. By reason of her special knowledge, executive energy, and unwearied zeal, the school had been established on a good basis, and conducted through its most critical period with admirable skill.

The school fortunately was able to secure as Acting Superintendent, Miss Almira C. Davis, who, by technical education and previous extensive hospital experience, was well fitted for the position, and whose management of the affairs entrusted to her care deserves the commendation of the Board. All the nursing in the Hospital is in charge of the school. During the past year 12 pupils have finished the required course and received diplomas, and are successfully engaged in their calling, here or elsewhere.

There are now 5 head nurses, who are graduates of our school, 4 head nurses, graduates of other schools, 5 senior pupils acting as head nurses, 24 assistant nurses, who are pupils, and 6 probation nurses. During the past year 31 have joined the school, and 27 have left. Of the latter, 15 left on account of lack of strength, ill-health, discourage-

ment, or were rejected as undesirable; 7 have been discharged, 4 from various other causes, and one died of typhoid fever. During the past year instruction has been given systematically and with good results; there have been 146 class recitations by the lady Superintendents, and 5 formal examinations conducted by members of the Hospital staff.

The medical staff have given lectures to the whole school as follows: —

6	General diseases and emergencies,	by	Dr.	Arnold.
2	Poisons	"	"	Ingalls.
3	Eruptive fever . . .	"	"	Mason.
2	Anatomy	"	"	Dwight.
2	Common sense in the sick-room	"	"	Draper.
2	Care of the eyes . .	"	"	Wadsworth.
5	Surgical dressings and appliances	"	"	Gay.
3	Administering of medicine .	"	"	Bolles.
3	Nursing in confinement .	"	"	Stedman.
3	Physiology and food . .	"	"	Edes.
2	Care of the eyes . .	"	"	Williams.
2	Nursing and care of skin disease	"	"	Wigglesworth.
3	Care of nervous patients .	"	"	Webber.

2	Nursing and dressing of fractures	"	"	Homans.
1	Nursing of insane patients .	"	"	Denny.
3	Anatomy	"	"	Cutler.
1	Circulation of blood . .	"	"	Plimpton.

Making a total of 46 lectures during eight months.

I venture to recall your attention to the recommendation of my predecessor in regard to a home for nurses. In his last report he says: —

> It is very desirable now that there should be connected with the Hospital a home for nurses, where they could go when off duty, and be relieved from the depressing influences of living constantly in the vicinity of the sick. The rooms the nurses now occupy in the Hospital could then be given up to the patients, and the space thus gained for the latter would offset the cost of giving proper accommodations to the nurses elsewhere.

My own experience leads me to emphasize this recommendation as one of the special objects most desired at the present time. A suitable building could be erected on our own grounds at a moderate cost. From this would accrue an improved physical condition, and a more healthy tone in the nurses. The Hospital would thus command and keep more

of the better class of persons seeking this work, and the general gain would be reflected in the welfare of the sick. Of those who have left the Training School during the last year, nearly one half resigned from lack of strength, ill-health, or discouragement. As the nurse is so important a factor in the treatment of the sick, her well-being cannot be overlooked.

Attention is called to the large increase in visits of persons seeking advice in the out-patients' department. The present accommodations are altogether too small. Seven different services are compelled to use the only three rooms available at the Lodge, necessitating alternate days, and thus only partially meeting the demands of that part of the Hospital work. This embarrassment could be remedied at a small expense, which would prove a judicious expenditure.

My special and heartiest thanks are due my predecessor, Dr. Edward Cowles, for his painstaking kindness in familiarizing me with the system and methods of the Hospital work. I desire to express my appreciation of the excellent condition of the Hospital at the time I assumed charge, in the discipline of its service, methods of administration, and general efficiency in the daily work. It has been my endeavor that this high standard should be fully maintained, and no special attempt has been made to introduce innovations.

Miss A. C. Davis, as Matron and Superintendent of the Training School, has shown untiring devotion in the arduous duties involved in her delicate and laborious office, and merits a special word of approval.

Mr. Samuel M. Nesmith continues in the responsible position of Steward, proving himself efficient and trustworthy, rendering me satisfactory aid in his department.

The vacancy in the office of Apothecary was filled, in October, by the appointment of Mr. G. R. Tucker, who has discharged the duties of his office with fidelity, improving the service of his department, and fully realizing the expectations formed at the beginning.

Dr. Lewis H. Plimpton has given me valuable aid in office work and administrative duties.

The various subordinate officers and employés have shown themselves faithful in their various and oftentimes irksome duties.

I make grateful mention of the kindly interest and attention to our sick shown by the clergy, the "Flower Mission," the "Hospital Newspaper Society," the lady readers, the always welcome flowers sent by Mrs. Quincy A. Shaw, the friends who have contributed pictures, books, fruit, clothing

for poor patients, a generous donation of toys for the children, and the liberality of the "Jamaica Plain Sewing Society" in making garments.

I am happy to acknowledge the many official and personal courtesies received from the members of the medical and surgical staff, whose sympathy and coöperation have been invaluable.

My thanks are due the President and Board of Trustees for the confidence and support they have given me, and for the liberal policy with which they have conducted the year's work.

I have the honor to be,

Your obedient servant,

GEO. H. M. ROWE,

Resident Physician and Superintendent.

REPORT OF THE HOSPITAL STAFF.

MEDICAL DISEASES.

BEQUESTS.

GOODNOW FUND. — ELISHA GOODNOW, of South Boston (Ward XII.), who died in the year 1851, and whose will is dated 12 July, 1849, bequeathed to the city "all the rest and residue of his estate, real and personal, not otherwise disposed of," for the purpose of establishing, in the Eleventh or Twelfth Wards of the city, a Hospital for the sick; one-half of said funds to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the Officers of the Government of said Hospital for the time being. Under this will the city came into possession of certain real estate situated on Cross street, which has been disposed of and has produced the sum of $16,500, which has been invested in City of Boston Six per cent. Stock. Also a lot of land on Third street, South Boston, containing 6,683⅓ feet, which was disposed of in 1867 for $4,623.25, of which $4,000 has been invested in City of Boston Five per cent. Stock, and the balance ($633.25) remained in the City Treasury at interest, until it amounted to $1,000, and was invested in a City of Boston Six per cent. Currency Note. The $10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows: —

$500 to the Penitent Females' Refuge.

$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.

NICHOLS FUND. — LAWRENCE NICHOLS, who died in September, 1862, made the following bequest to the city: "I give to the City of Boston, towards the establishment and endowment of a City Hospital, in case such Hospital shall have been established at the time of my decease, the sum of one thousand dollars." And in case such Hospital should not have been established by the city at the time of his decease, he directed the same amount to be deposited with the Massachusetts Hospital Life Insurance Company, and suffered to accumulate, by the addition of interest, until such a Hospital should be established.

The executor of the will, Wm. Perkins, Esq., has paid into the treasury nine hundred and thirty-seven dollars and twenty-five cents ($937.25), being the amount devised, less the *Internal Revenue Tax* on the same, and $530.50, as one of the "*residuary legatees in the United States*," from the surplus remaining undisposed of. The $937.25, with the accumulated interest thereon, has been invested in a certificate of City Stock for $1,000. The balance ($530.50) remained at interest until it amounted to $1,000 and was invested in a City of Boston Six per cent. Currency Note.

Norcross Fund. — 1868, January 1. The Trustees received the sum of two thousand dollars from Hon. Otis Norcross, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing. The principal sum is invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which is to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing in which to leave the Hospital, and have no means of procuring it.

Balance on hand May 1, 1879	$121 41
Expended	30 10
Balance May 1, 1880	$91 31

Ball Fund. — 1870, April 1. The Trustees received from the estate of Mr. Jonas Ball the sum of one thousand dollars for the same purpose, and under the same restrictions, as the Norcross Fund.

Balance on hand May 1, 1879	$239 03
Expended	28 57
Balance May 1, 1880	$210 46

Goodnow Library Fund. — 1874. Donation of George Goodnow, the interest of which to be expended annually by the Board of Trustees in replenishing the library of the Hospital with books and pamphlets suitable for the reading of the patients during convalescence.

Balance on hand May 1, 1879	$150 00
Expended	42 58
Balance, May 1, 1880	$107 42

SHAW FUND. — 1875. Bequest of the late MARY LOUISA SHAW, the income of which to be expended by the Trustees for the purchase of flowers and fruit for the use and comfort of the patients in the Hospital.

Balance on hand May 1, 1879	$170 00
Expended	47 00
Balance, May 1, 1880	123 00

RECAPITULATION CITY HOSPITAL TRUST FUNDS.

	$29,500 00

The Ordinance in relation to the City Hospital, Ordinances of 1876, Sect. 9, page 433, provides that said scrip shall be deposited with the Auditor of Accounts, who shall receive the interest as the same shall become due thereon, and add it to the moneys which shall have been appropriated for the use of the Hospital.

RULES FOR ADMISSIONS AND DISCHARGES, Etc.

Applications for admission of patients shall be made to the Resident Physician at the Hospital, on each day of the week, Sunday excepted, between 9 and 11 A.M.

Whenever able, the patient shall apply in person. When not able to appear in person, application may be made by a friend, and the patient shall be visited at his residence.

Any Trustee, or either of the physicians or surgeons in attendance, may, in case of emergency, send a patient in the first instance to the Hospital by written permit, and the Visiting Committee shall decide, as soon as may be afterwards, whether such patient shall remain.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee, and they shall have the power at any time to require the Resident Physician to report to them the names of applicants, before admitting them, and may dismiss any patients whom they think improperly admitted, or change the terms of admission.

Patients discharged on the recommendation of the physicians or surgeons shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved, or not relieved, which certificate shall be signed by the Superintendent and Resident Physician.

Whenever a patient is removed from the Hospital without the consent and approval of the Superintendent and Resident Physician, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

The body of any person dying at the Hospital shall not be delivered without a written receipt from the parties taking the same.

In case of the decease of any patient, the Resident Physician shall sign a certificate to that effect, and shall furnish the City Registrar with a copy of the same. He shall also state the time and cause of death, the disposition made of the body, whether delivered to friends or buried from the Hospital. In the last case he shall mention the place of interment.

Patients may be admitted by the Trustees to the privileges

of the Hospital, at such rates of board as they may from time to time determine; such board being secured by their friends, or by the authorities of the place to which they belong.

In all cases where, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments or articles not usually furnished at the Hospital are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

House Rules.

Patients must be in their proper places in the wards during the visit of the physicians and surgeons, and always by 8 P.M., unless specially exempted by the Superintendent.

Those free patients who are able are expected to assist in nursing, and in such other services as may be reasonably required of them.

Patients shall not leave the Hospital grounds without a pass from the Superintendent, nor their respective wards without the consent of the nurse in attendance.

No patient shall purchase, or cause any member of the household to purchase for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent; nor shall any officer or servant of the Hospital receive a gift or fee from a patient.

Profane or obscene language, loud talking and incivility, are prohibited.

No patient having acute syphilitic disease or *mania-á-portu* shall be admitteed as a charity patient, or at a lower rate than twenty-five dollars a week for the former, and fifteen dollars for the latter.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms, which, in the opinion of the physician or surgeon, are capable of being relieved.

Patients may be visited by clergymen of their own selection, and, where there is a wish for the performance of any particular religious rite, it shall be indulged, when practicable.

It is expected that patients will implicitly obey the rules of the Hospital. Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable shall be by them reported to the Trustees.

All employés must be in their respective places during their hours of duty. The doors and gates of the Hospital

will be closed at 10 P.M., at which time all are expected to be quiet, and, those not on duty, in their own rooms.

The use of tobacco, wine, and intoxicating liquors is prohibited within the Hospital, unless prescribed by a physician.

Visitors.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or some one of the Trustees.

On Monday, Tuesday, Thursday, and Saturday of each week, from two to three o'clock P.M., friends may be permitted to visit patients, though no patient shall receive more than one visitor on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

All visitors must leave when the bell rings at the expiration of the visiting hour.

No visitor will be permitted to take any meal in the Hospital, or pass the night therein without permission from the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to the patient shall be left with the Superintendent.

THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

The Trustees of the Boston City Hospital have made arrangements for giving a two years' course of training to women desirous of becoming professional nurses.

Those wishing to receive such a course of instruction must apply to the Superintendent of the City Hospital, Boston.

The most desirable age for candidates is from twenty-five to thirty-five years; they must be in sound health, and must present, on application, a certificate from two responsible persons (one a physician, preferred) as to their good character and good health. Upon the recommendation of the Superintendent of the Hospital, and the approval of the Trustees, they will be received for one month on probation. During this month they are boarded and lodged at the Hospital, but receive no compensation.

The Superintendent of Nurses has charge of the Training School, under the authority of the Superintendent of the Hospital and of the Board of Trustees, and the nurses are subject to the rules of the Hospital. Their fitness for the work, and the propriety of retaining or dismissing them at the end of the month of trial, is determined by the authorities in charge of the school, under the direction of the Trustees, and the same authorities can, in like manner, discharge them at any time, in case of misconduct or inefficiency. They reside in the Hospital, and serve as assistant nurses in its wards.

All nurses are required to be sober, honest, truthful, trustworthy, punctual, quiet, orderly, cleanly, neat, patient, kind, and cheerful.

Course of Training.

Those fulfilling the conditions of the probationary month are accepted as pupils. They must sign a written agreement to remain at the school for two years, and to conform to the rules.

The instruction includes: —

1. The dressing of blisters, burns, sores, and wounds. and applying of fomentations, poultices, and minor dressings,

2. The applying of leeches, and subsequent treatment.
3. The administering of enemas.
4. The applying of friction to the body and extremities in the best method.
5. The managing of helpless patients in bed, in moving, changing clothing, giving baths, keeping patients warm or cool, preventing and dressing bed-sores, managing position, etc., and in feeding.
6. The making of bandages and rollers, etc., and bandaging.
7. The making of beds and changing sheets, etc., with patients in bed.
8. The cooking, preparing, and serving of food and delicacies for the sick.

They are also given some instruction in the best practical methods of supplying fresh air, warming and ventilating sick-rooms in a proper manner, and are taught to take proper care of rooms and wards; in keeping all utensils perfectly clean and disinfected, etc.; to observe the sick accurately in regard to the state of the secretions, expectorations, pulse, breathing, skin, temperature, eruptions, sleep, appetite, effect of diet or of stimulants and medicine; and the managing of convalescents.

The instruction is given mainly by the Superintendent of the Training School, and by the head nurses. Lectures, recitations, and demonstrations, also take place at stated periods. Examinations, chiefly upon practical points, will take place from time to time.

The pupils are employed as assistant nurses in the wards of the Hospital, and are paid ten dollars ($10) per month during the first year, and fourteen dollars ($14) per month during the second year, for their clothing and personal expenses. This sum is in no wise intended as wages, it being considered that their education during this time is a full equivalent for their services.

They are required to wear at all times, while on duty in the wards, dresses of material that can be washed, simply made, and such caps, cuffs, and aprons as may be prescribed.

When the full term of two years is completed, the nurses, thus trained, receive (after final examinations) diplomas certifying to the regular course of training, their knowledge of nursing, and their ability.

The right is reserved to terminate the connection of any nurse or pupil with the school for any reason which may be deemed sufficient.

A blank form will be furnished to applicants to be filled in with answers to the following questions in the candidate's own handwriting, and sent to the Superintendent of City Hospital, Boston, Mass.

QUESTIONS TO BE ANSWERED BY CANDIDATE.

1. Name in full, and present address of candidate.
2. Are you a single woman or widow?
3. Your present occupation or employment.
4. Age last birthday, and date and place of birth.
5. Height? Weight?
6. Where educated?
7. Are you strong and healthy? Have you always been so?
8. Are your sight and hearing perfect?
9. Have you any physical defects?
10. Have you any tendency to pulmonary complaint?
11. If a widow, have you children? How many? Their ages? How are they provided for?
12. Where (if any) was your last situation? How long were you in it?
13. The names in full and addresses of two persons to be referred to. State how long each has known you. If previously employed, one of these must be the last employer.

I declare the above statement to be correct.

Signed,

Candidate.

Date.

AN ACT

TO INCORPORATE THE TRUSTEES OF THE CITY HOSPITAL OF THE CITY OF BOSTON.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows: —

Section 1. The Trustees of the City Hospital of the City of Boston for the time being are hereby made a corporation by the name of the Trustees of the City Hospital of the City of Boston; and said Trustees and their successors in office shall continue a body corporate for the purposes hereinafter set forth, with all the powers and privileges, and subject to all the duties, restrictions, and liabilities in the general laws relating to such corporations.

Sect. 2. Said corporation shall have authority to take and hold real and personal estate to an amount not exceeding one million dollars, which may be given, granted, bequeathed, or devised to it, and accepted by the Trustees for the benefit of the City Hospital of the City of Boston, or any purpose connected therewith. Money received by it shall be invested by the Treasurer of the City of Boston, under the direction of the Finance Committee of said city; and all securities belonging to said corporation shall be placed in the custody of said Treasurer: *provided*, always, that both the principal and income thereof shall be appropriated according to the terms of the donation, devise, or bequest, under the direction of said corporation.

Sect. 3. The Trustees of the City Hospital shall be seven in number. In the month of April, in the year eighteen hundred and eighty, and annually thereafter in the month of January, the City Council shall elect, by concurrent vote of the two branches, one member of the Board of Aldermen and one member of the Common Council to be members of said Board of Trustees, to hold office during the remainder of the municipal year in which they are elected, and until others are elected in their places. And in the month of April, in the year eighteen hundred and eighty, the Mayor shall appoint, subject to the confirmation of the City Council, five citizens of Boston, not members of the City Council, to be members of the Board of Trustees of the City Hospital, one of whom shall hold office for five years, one for four years, one for three years, one for two years, and one for one year; and upon such election, and such appointment and confirmation, the terms of office of the Trustees of the City Hospital then holding office shall cease and determine.

And annually thereafter, in the month of April of each year, the Mayor shall appoint, subject to the confirmation of the City Council, one citizen at large as a Trustee of the City Hospital, to serve for a term of five years from the first Monday in May in the year in which he shall be appointed. The Trustees shall at all times be subject to removal from office for cause, by a vote of two-thirds of each branch of the City Council present and voting thereon. Whenever any vacancy shall occur in said Board of Trustees by death, resignation, or otherwise, said vacancy shall be filled by the election or appointment, in the manner aforesaid, of another Trustee, who shall hold office for the residue of the unexpired term. No member of said Board of Trustees shall receive any pecuniary compensation for his services.

Sect. 4. The members of said Board shall meet for organization annually on the first Monday of May, and choose one of their number as president. They shall have power to make such rules and regulations relating to said City Hospital and its officers and servants, and to fix and enforce penalties for the violation of such rules and regulations as they may deem expedient; *provided* that the same shall not be inconsistent with the provisions of this act, and shall be subject at all times to such limitations, restrictions and amendments as the City Council may direct.

Sect. 5. The said Trustees shall, subject to the direction of the City Council, by ordinance or otherwise, have the general care and control of the City Hospital, and of all branches thereof, which have been or which may hereafter be established, together with the buildings and rooms containing the same, and the fixtures and furniture connected therewith, and also of the expenditures of the money appropriated therefor.

Sect. 6. The said Board of Trustees may appoint a Superintendent, with such assistants and subordinate officers as they may think necessary or expedient, and may remove the same, and fix their compensation; *provided* that the amount thus paid shall not exceed the sum appropriated by the City Council for that item of expense, and the income of any moneys which may lawfully be appropriated for the same purpose from funds or property held by said Trustees under the provisions of this act.

Sect. 7. The City Council shall have power to pass such ordinances, not inconsistent herewith or repugnant to other laws of the Commonwealth, as to the duties and authority of said Board, as they may from time to time deem expedient.

Sect. 8. This act shall take effect upon its passage.

[Approved April 7, 1880.]

SHELF No.
